

AC Pro 95% Single Stage Non-Variable Furnace

AC PRO MAKES CHOOSING THE RIGHT FURNACE THE SIMPLEST CHOICE OF ALL

A furnace can do more than make you feel comfortable. It can also make you feel confident. AC Pro builds every furnace to deliver on both counts. From rugged construction to energy efficiency to fast installation, it's the right choice to make every time.

WHEN YOU GET THE 95G1, YOU GET A LOT. AND YOU GET IT NOW.

Efficiency

95% AFUE* means 95% of your fuel is converted into usable heat, for season-long energy savings.

Dependability

A 10-year limited warranty on parts and a limited lifetime warranty on the aluminized steel heat exchanger (with registration)** mean lasting comfort and peace of mind.

Decreased sound levels

A durable PSC blower motor will provide years of reliable operation.

The robust aluminized steel heat exchanger is crimped, not welded, for long life and safety.

Sealed service doors reduce burner and air noise.

The anti-vibration blower assembly helps reduce noise during startup and shutdown for peaceful, quiet operation.

* Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10-15 years old, it probably falls below the current minimum and wastes energy

** Applies to residential applications only. For terms, conditions and exclusions, see full warranty at acpro.com.

Over the years, a hardworking AC Pro furnace can save you hundreds of dollars on utility bills

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.
